ATOOSA BIGLARI

TECHNICAL PROGRAM MANAGER | AI, CLOUD & INFRASTRUCTURE | ENTERPRISE TRANSFORMATION

Palo Alto, CA | +1 650-944-9050 | hi@atoosabiglari.com | linkedin.com/in/atoosabiglari | github.com/atoosabiglari-PM

PROFESSIONAL SUMMARY

Technical Program and Project Manager with 10+ years across AI, cloud, data centers, networking, enterprise software, migrations, and global operations. Leads cross-functional execution, dependencies, risk, and stakeholder reporting. Experience includes a ~$145M Meta infrastructure environment, a $25M Avon migration, and $150M-$500M international EPC programs. Builds governed AI workflows using Gemini, Python, APIs, cloud services, and human-in-the-loop controls; current consulting includes digital product delivery and business-growth planning.

CORE EXPERTISE

Technical Program Management • Cross-Functional Delivery • AI/LLM Workflows • Cloud, Data Center & Network Infrastructure • Migration & Cutover • Risk, Dependency & Change Management • Vendor Governance • Agile/Scrum • AWS/GCP/Azure • Jira/Confluence/MS Project • Business Analysis • Business Development & GTM Planning

INDEPENDENT PROJECTS AND CONSULTING

Atoosa Biglari | Independent Projects & Consulting | 2025 - Present

Technical Program & Product Lead | Independent Consultant

Selected AI Products

- DataReady Autopilot: built and deployed a constrained Gemini repair planner with Python, deterministic validation, automated tests, source preservation, and human-controlled execution on Google Cloud Run.
- DecisionReady: built and deployed a governed AI decision workflow with readiness gates, human approval, version control, and auditable decision history.
- RightsReady: built a GCP-based trusted-ingestion and AI workflow using Gemini, with provenance, controlled processing, and traceability.
- HooraAI: developing an AI digital-workforce prototype, translating strategy into requirements, architecture, phased delivery, governance, and human-in-the-loop controls.

Manghal Restaurant | Business Growth & Digital Transformation

September 2026 - Present | Sunnyvale, CA

- Delivered digital event and commerce capabilities using AI-assisted development, integrating online payments, QR ticketing, customer communications, and staff workflows; translated business requirements into operating rules and functional checks.
- Created promotional content and identified website/menu inconsistencies and operational improvement opportunities across restaurant and bar offerings.
- Developing business-growth and go-to-market plans for hotel partnerships, QR-based ordering, restaurant-managed delivery, menu development, and event marketing.

PROFESSIONAL EXPERIENCE

Yup & Rose International Market | Mountain View, CA (Hybrid) | Dec 2022 - 2024

Project Manager - IT, Cloud & Operations

- Led technology and data-lifecycle coordination for a ~100-vehicle nationwide fleet, connecting cameras, vehicle communications, cloud, CRM, supply-chain, delivery, and customer-service systems.
- Coordinated AWS/GCP migration readiness, system dependencies, risks, and execution across operational teams and vendors.
- Consolidated fleet, vendor, and service dependencies into actionable reporting, issue resolution, and program visibility.

Infogain - Intuit | Remote | Mar 2020 - Apr 2020

Project Manager - AWS / Software Migration (Short-Term Contract)

- Supported Intuit software modernization and AWS migration, tracking plans, schedules, dependencies, and cross-functional status.
- Tracked risks, milestones, and stakeholder reporting using Microsoft Project, Jira, and Excel; contract ended during COVID-19 workforce reductions.

HCL America | Hybrid & Remote | 2018 - Oct 2019

Program / Project Manager - Scrum Master | Enterprise Client Programs

- TiVo/Xperi: coordinated Office 365/Azure, networking, security, data-center/colocation, CMDB, licensing, SOW/BOM, vendors, and restructuring dependencies in an environment of ~2,000 employees serving ~6M subscribers.
- Avon: supported a $25M mainframe/AS400 migration and critical ~48-hour Plano data-center cutover, coordinating infrastructure dependencies, risk reporting, and business continuity.
- Broadcom / CA Technologies: coordinated post-acquisition infrastructure and application dependencies across AWS/GCP, data centers, Airflow, APIs/DevOps, Oracle, VMware/Nutanix VDI, service desk, and privacy.

Google - Akorbi / HCL Client Assignment | Sunnyvale, CA / Atlanta, GA | Jul 2018 - Sep 2018

Project Manager - Network & Data Center Logistics (Contract)

- Supported Google's global data-center/colocation program, translating network-asset assessments, infrastructure dependencies, and deployment requirements into actions, risks, and reporting.
- Conducted an Atlanta infrastructure/vendor assessment, reviewing technical and operational records and consolidating gaps for planning and stakeholder visibility.

Facebook / Meta - EBsoft / HCL Client Assignment | Menlo Park, CA | Oct 2017 - Jun 2018

Project Manager - Network Infrastructure (Contract)

- Coordinated network infrastructure, asset lifecycle, deployment, and RMA across Meta's global data centers in an ~$145M program spanning APAC, Europe, and North America.
- Managed relocation and return of ~150 routers and related infrastructure from Cisco, Juniper, Arista, and other vendors, achieving complete return-to-destination for in-scope equipment.
- Resolved customs, legal, logistics, and deployment dependencies across technical teams; tracked hardware ownership, vendor escalations, and program risks.

Holding Ltd. Stratus / Siraf / FTCC | Dubai (Offshore) | Jul 2013 - Jun 2016

Program Manager - Vendor Management & EPC Projects

- Managed procurement and vendor governance across ~$150M-$500M international EPC/oil-and-gas programs, connecting engineering demand, sourcing, quality, contracts, logistics, and site delivery.
- Evaluated thousands of industrial/IT products and vendors across China and Europe, coordinating specifications, qualification, quality, SOW/BOM, and delivery risks.

Devine Technologies | Pune, India | Oct 2010 - Jun 2012

Scrum Master / Project Manager - Automotive Software

- Managed interactive customer-education software delivery for multiple U.S. automotive clients, translating vehicle operation, maintenance, and repair information into CD-based training products.
- Coordinated SDLC execution, content integration, user trials, defects, releases, installations, and delivery readiness.

Joint Venture - Ranasons & Top Technique | Mumbai, India / Tehran, Iran | Apr 2002 - Jul 2009

Project Manager - Business Development & Cross-Border Operations

- Coordinated Iran-India molding-machinery programs for Middle Eastern markets in a $3M+ business; represented the company at 3+ international exhibitions.
- Bridged executives, customers, engineers, legal teams, and vendors; drafted and negotiated contracts and supported customer negotiations through delivery.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications (BCA) | Bharati Vidyapeeth University, India | 2011

Master of Computer Science | Arihant College, Pune, India | 2013 | Hybrid

Selected Training & Certifications: AI Product Management - Pendo.io (2025); Google Cloud Machine Learning & AI (2023); Google Advanced Data Analytics (2023); Digital Transformation with AI/ML - Google Cloud (2023); Fundamental Data Science, Precision Medicine & Cloud Computing - Stanford Medicine (2023); Advanced Manufacturing - JobTrain / SEMI (2025, 62 hours); Microsoft Certified Systems Engineer (MCSE) and Cisco Certified Network Associate (CCNA) - CMS India (2007); One-Year Computer Programming Certificate - NIIT India, Tehran Branch (2005).
